Spring Cleaning Tips

Windows

Instead of just wiping down the inside of your windows, make sure you wash the outside of your windows to remove spots and smudges you don't usually have time to tackle. A tip we received from our window washing friends, is that it's easier to do them on a cloudy day. That's because the sun won't dry the cleaning solution as fast when it's cloudy and you'll have more time to get a streak-free look.

Patio Furniture

With patio season just around the corner, a great way to freshen up your exterior furniture is to wipe them down (minus the cushions) with a mixture of warm water and a squirt of Dawn Ultra Dish Soap. Then hose off the solution with water from your garden hose and let it air dry before enjoying. They'll look and smell cleaner while still being gentle to the environment.

Bed Time

People often wash their comforter three times a year, and sheets once a month, but what about your mattress? This spring, take time to clean it too. Use your vacuum's crevice tool to clean the surface and sides of your mattress. Once all the dust is cleaned off, give it a spray of Lysol to kill any bacteria.

Sticky Kitchen

Sticky kitchen grime is a mix of dust and grease that builds up over time. To cut through that nasty junk, use Parker & Bailey Kitchen Cabinet Cream. It destroys dirt and leaves the wood moisturized for a clean and healthy kitchen.
